

Press text Gianni v.R. (english)

Gianni v.R. started out playing music at the age of 15. After two years years of bedroom jamming he realized that vocals and lyrics were the missing piece to take his music to the next level. With this in mind he began recording his first guitar parts, later the melodies and at last the mentioned pile of words. During a year of solo travelling he learned to love the reduced sound of folk music and played gigs in local pubs and bars. With his songs about the struggles and little joys of a daily life he is seeking to connect the dots between hope and anxiety that seems to keep the world turning. Currently based in Mainz, the musician is seeking to share his songs with the audiences of the region.
